Column	Count	Min	Max	Mean	Median
student_id	490	1	490	245.5	245.5
Attendance (%)	490	72.1	97	84.36	84.15

Executive Summary

The current dataset contains no records or metrics for evaluation. Immediate data ingestion is required to establish baseline key performance indicators, enable operational tracking, and generate actionable business intelligence insights for executive decision-making.

Key Findings

- Zero total rows recorded
- Dataset completeness is empty
- Quality score unmeasurable
- Missing values count is zero
- No duplicate rows detected

Business Insights

- Data pipeline requires immediate attention
- Analytics dashboard lacks source data
- Operational visibility is currently blocked
- Reporting infrastructure is idle
- Baseline metrics cannot be established

Risks

- Complete lack of operational visibility
- Inability to track key performance indicators
- Potential data pipeline failure
- Uninformed executive decision-making
- Delayed strategic response times

Opportunities

- Implement robust data ingestion pipelines
- Establish automated data quality checks
- Define core business metrics early
- Deploy real-time monitoring dashboards
- Standardize data collection processes
